Company BIO:

Wright Intel Solutions, LLC (WIS) was established to address the critical need for integrating emerging, data-focused technologies into government operations, thereby enhancing the United States' strategic global position. At the forefront is CEO Lynn Wright, whose 35-year tenure in defense intelligence, including a significant role as Director of Naval Intelligence, equips WIS with unparalleled leadership in navigating the complexities of government and technology intersections. Alongside a Chief Scientist with deep expertise from NSA and NRO engagements, and a team skilled in technology and organizational development, WIS is adept at fostering collaborations between innovative tech companies and government entities. This ensures the seamless introduction of advanced technologies into national security and intelligence operations, bridging the 'valley of death' for startups aiming to contribute to government capabilities.

Core Competencies:

Wright Intel Solutions, LLC (WIS) enables the effective bridging of technological innovation with government operational needs. With a leadership team experienced in high-level defense intelligence and technology inte-gration, WIS excels in strategic planning, programmatic execution, and the adoption of new technologies within intelligence operations. Key areas of expertise include:

- **Product Alignment:** Expertise in aligning compa-nies' existing product lines with government needs.
- **Teaming Partner Strategy:** Identifying and facilitat-ing partnerships with complementary companies.
- **Systems and Data architectures.** Geo Location and multi-sensor integration and data fusion.

Differentiators:

Wright Intel Solutions, LLC (WIS) stands out as a Wom-an-Owned Small Business (WOSB), enhancing our eligibility for spe-cific government contracts and incentives. Our unique position enables us to offer clients a competitive edge in securing government contracts, supported by our deep understanding of the defense and intelligence sectors.
